Increase accessibility, improve audit trail and eliminate paper

This EASY Solution™ for MAS 500 modifies the standard printing process to automatically print all batch journals and registers to Adobe PDF format. Once printed, documents are easily organized using the Paperless Office Report Viewer facilitating retrieval of these documents from within the MAS 500 application. This highly configurable application allows the user to specify a variety of printing rules.

In addition to PDF document printing, Paperless Journals and Registers application allows the user to disable the standard MAS 500 "Preview" printing option, eliminating the possibility of updating a journal or register without retaining a printed or PDF copy.
